Cash System! Cash System! Since my first announcement that I

proposed to place my business on a cash basis on Jan. 1st, I have received much encouragement from many of my customers. They appreciate the fact that it is a tair system, as all pay cash or its equivalent; they do not, as under the credit system, have charged to them the less suffered by some debter who has "skipped" his account, and frequently the country. Also the cash system has harmonious influences, there being fewer circumstances to create difficulties between the dealer and his oustomers, such as dunning, refusal of credit, sucing, etc. I have in reserve a good proof that it pays to buy for eash. It is a price list, which will be out January 1, 1883. Send or call for one. Respectfully,

JERRY SCHOOLING.

SATURDAY.JANUARY 20, 1882. THE NATIONAL DEBT.

The Sacramento Bee says "the American people have shown their anxiety to pay the national debt, in order that they may cease paying interest. The national bankers and the other holders of the bonds are auxious on the other side that the bonds shall not be paid-never be paid-for they would prefer to draw the interest, and they are working on Congress to abolish certain internal revenues and certain tariffs, in order that there may not be means to pay off the national debt. This is pure selfishness upon their part, and on the other hand it is pure selfishness on the part of the people, who want to save themselves from paying interest; but the people are the majority, and what is their interest is for the good of the multitude. The sum of \$15,000,000 of the national debt was paid in the month of December last, and we are assured that the reduction during the first six months of the present fiscal year excepts \$81. 000,000, while the reduction during the whole of the fiscal year which ended with June 30, 1882. was \$151,000,000. The total debt is footed up now at \$1,920,467,693 31. At the rate of last year's reduction the debt would be extinguished in about twelve years. But in the general estimate of the public debt the \$350,000,000 of national currency are included, which, of course, is not a debt and will never have to be paid, because it is itself valid money and the most popular money we have. At -any rate, let us keep on getting out of debt. Let us reduce as fast as we properly can the mortgage on the farm. It is better that the public shall have the interest than that the bankers and bondholders shall have it."

A Washington special reports that Senator Cameron will not, under any circumstances, be a candidate for reelection to the Senate. Since the election Cameron has been consulted by the leading Republican managers of Pennsylvania, among whom he has sustained the most intimate and confidential relations. Cameron himself, it is said, cares very little to enter such a fight as would be precipitated by an effort to retain his seat. He is by no means satisfied that he could get there should he fully desire to make the contest.

The Enterprise says Superintendent Rhodes is actively working the Humboldt sulphur mine. They have a deposit of pure brimstone. All they have to do is to blast it out. Each blast prepared for this, and after a shot is fired they at once advance and throw water upon the burning mineral. Those who work in a brimstone mine seen become accustomed to "blue blazes." The regions of the old gentleman down

Nevada can get along very well with a Legislature composed of 45 members, 15 in the Senate and 30 in the Assembly.

Of the new road north and south through Nevada, which it is said the Central Pacific contemplate building,

the Sacramento Bee has this to say: It is stated by the Modoc Independent that large quantities of railroad material are being received at Wadsworth for the building of a branch railroad from that place northward to the Dalles, Oregon. The Independent seems to have reason for believing that the road will be started the coming Spring. It was stated in these columns some time since, that the Central and Southern Pacific people intended to construct a line of railway east of the Sterras from Colton, or from Mohave, to Eastern Oregon, which would out the Central near Wadsworth, beginning the work so seen as the Southern road should be same rate that California grain can be to me as if there would be a call there

THE NEXT REPUBLICAN NA-TIONAL CONVENTION.

The Republican National Committee has fixed the apportionment for the next National Convention. It was decided that the Republican National Convention of 1884 shall consist of four delegates-at-large from each State, and two delegates from each Congressional district. The delegates-at-large shall be chosen by popular delegate State conventions called on not less than twenty days' published notice, and held not less than thirty nor more than aixty days before the time for the meeting of the National Convention. The Republicans of the various Congressional districts shall have the option of the election of their delegates at separate popular delegate conventions, called on a similar notice, and held in their districts at any time within fifteen days next prior to the meeting of the State Conventions, or by subdivisions of the State Conventions into district conventions; and such delegates shall be chosen in the latter method, if not elected previous to the meeting of the State Convention. All district delegates shall be accredited by the offices of such district conventions. Two delegates shall be allowed from each Territory and from the District of Columbia, to be similarly chosen. Notices of contests may be given to the National Committee, accompanied by full printed statements of the grounds of contest. which shall also be made public; and by the Convention, according to the dates of the reception of such notices gan urging me to become a candidate." and statements by the National Committee.

It was ordered that the meeting of the Committee, at which the time and place for holding the next Republican National Convention are to be fixed, be set for the 13th of December next at Washington.

Chandler offered the following resolution, which was adopted without discus-

Resolved, That the call of the next Republican National Convention shall be so broad and liberal as to invite the co-operation, without imposing any other test of fealty; of all citizens who ne in favor of elevating and dignifying the American laborer, protecting and extending home industries, giving free, popular education to the masses of the people, securing free suffrage and the bonest counting of ballots, and effectually protecting all human rights in every section of our common country. and who are willing to support the nominees of the Convention.

A Big State.

The Galveston News scouts the idea that Texas is growing too unwieldy for a single Commonwealth. It glories in the size of the State which, with insets the brimstone on fire, but they are creasing population and wealth is becoming less instead of more aunwieldy, and is now far more of a coherent and homogenous Commonwealth than when its population are few, scattering and poorly off. A Proposed Democratic Review.

An article in the North American Review, from ex-Governor Seymour, is exciting attention in political circles. It is said to be his aim, with other Democratic leaders in the campaign with his views, to celebrate the approaching anniversary of Washington's birthday by having a grand renewal of the party in Ten dollars would have paid for the the spirit of Washington's farewell address, and to that end an effort will be Sole Agents for Pacific Coast made to have a representation from every State in the Union. A correspondence with that end in view is already begun. The meeting will be in New York, Albany or Utica, as the future may determine. The ex-Governor's Review article is said to have been written to prepare the way for this demonstration.

> Crocker Thinks "the Chinese Must Come."

Charles Crocker, now in New York, being asked concerning the New Orleans extension of the Southern Pacific, said he expected an excellent business over that route. They had already applications for the transportation of negro laborers from the South to California. "They are needed in the vineyards and in the cotton fields that are being opened completed—and this is probably the in the southern pare of the state.

Big Hearted Men

The Appeal is informed that there are at least twenty-five widows on the Comstock-widows of miners killed while following their vocation, who with their children, would be paupers on the county were it not for the aid extended them by members of the Miners Union, although these men do not know what day they may be thrown out of employment, by reason of the stagnation of the mining industry, yet they share the little with the families of their unfortunate dead comrades. There is no denying the fact that the Comstock miners, as a class, are the biggest hearted men in existence.

A Million Dollars for a Newspaper

It is rumored here that Horace White, formerly editor of the Chicago Tribune, and nuder whose management it went upon the independent track in politics, is anxious to take up his home in Chicago again, and that, with plenty of backing, he is trying to purchase the Times newspaper. It is said that \$1,000,000 is the figure offered, but thus far refused by Mr. Storey, who wants a million and a quarter.

The Speakership.

S. S. Cox has said: "In my spinion New York will name the next Speaker, and if I receive the solid support of the New York delegation I shall enter the race with a strong hope of winning, as I the preference in the order of hearing have received voluntary support from and determining contests shall be given three of the California delegation and have had letters from Ohio and Michi-

> DESERT LANDS .-- Upon this subject the Austin Reveille has the subjoined: When Mr. Powning was making his canvass last November he said that if lected to Congress one of the principal things which should receive his attencion would be to have the deser- lands of Nevada so covered by water that they would soon blossom as the rose. He had a very fine project in mind, and one which struck us as entirely practicable. There are vast tracts of land, now entirely useless, which could be made very productive if irrigatable. To do this artesian wells were to be sunk at places where the rivers cannot be conducted. All this would cost money, but the sale of the new lands and the increased taxable property would more than repay any expenditure. Senator Hobart had semething of this kind in his mind when he introduced the concurrent resolution, which we published Saturday. The matter is well worth investigation.

A STALWART. -The Carson Appeal reports this:

Dr. Lee was offered the position of physician to the Orphans' Home by Messrs. Preble and Young, but declined on the ground that he was a straight Republican.
